Professional Summary

Computer Science (AI & ML) undergraduate with an 8.93 CGPA and a strong foundation in Python, Java, Machine Learning, and NLP. Proven ability to build end-to-end data pipelines, IoT hardware integrations, and scalable software solutions. Seeking roles in AI/ML Engineering, Data Analytics, and Software Development to leverage hands-on experience with Generative AI, cloud deployment, and advanced data preprocessing.

Education

Nagarjuna College of Engineering and Technology, Bengaluru 2023 – 2027
B.Tech CSE (AI & ML) CGPA: 8.93/10

Narayana Junior College, Hindupur 2021 – 2023
Intermediate (MPC) Percentage: 90%

Experience

Infosys Springboard Internship 7.0 (Batch 3) August 2026 – Present

- Selected for a competitive technical internship program to advance skills in modern software development, targeting a 100% completion rate of enterprise engineering modules.
- Engaging in 3 specialized training modules to bridge core academic computer science concepts with real-world enterprise technology implementations.

Technical Skills

- Programming Languages:** Python, Java, C
- AI/ML & Data Science:** Machine Learning, Natural Language Processing (NLP), Generative AI, Deep Learning, NLTK
- Data Analysis & Libraries:** Pandas, NumPy, Matplotlib, Power BI
- Databases & Cloud:** MySQL, MongoDB, ServiceNow (CSA)
- Tools & Technologies:** Git, Streamlit, Raspberry Pi, Unity 3D

Projects

Trash to Tech (Smart Waste Management Application) *Python, Machine Learning*

- Architected a machine learning-based waste classification system by engineering a large-scale corpus of Kaggle and web-sourced data, achieving over 85% categorization accuracy.
- Implemented a 4R mapping methodology to optimize sustainability outcomes, presenting the application to 500+ attendees at the Tech Vision 2026 expo at CMRIT.
- Awarded 2nd Prize out of 50+ competing teams at the National Level Project Expo.

SmartMirror-Vox (IoT Voice-Enabled Smart Mirror) *Raspberry Pi, Python, APIs*

- Designed an IoT-driven smart mirror on Raspberry Pi, integrating speech recognition APIs to enable hands-free voice commands with under 2-second response latency.
- Programmed 4 responsive display modules to simultaneously track real-time weather updates, live news feeds, date, and time metrics.
- Constructed backend scripts in Python to streamline API calls, improving automated data fetching efficiency by 30%.

NLP Text Processing Pipeline *Python, NLTK, GitHub*

- Engineered a robust natural language processing pipeline in Python to process the CoLA dataset, successfully handling and parsing over 1,000 complex linguistic records.
- Leveraged NLTK to apply advanced text preprocessing techniques—including tokenization, stop-word removal, stemming, and lemmatization—reducing raw text volume by 40% for faster classification.
- Managed project version control and codebase tracking effectively using Git

Snake Game *Python*

- Coded a fully functional Python Snake Game featuring accurate collision detection algorithms and real-time score tracking mechanics, maintaining a consistent 60 FPS frame rate.

Leadership & Achievements

- Event Leadership:** Organized and directed an automated technical quiz event for 100+ students, demonstrating strong leadership, event coordination, and technical team management.
- Technical Pitching:** Presented comprehensive technical project roadmaps to a panel of judges at the Cognizant Technoverse Hackathon 2026, earning a Certificate of Honor. Developed and pitched strategic presentations for the HackfiniX 24-hour hackathon.
- Workshops:** Built 6+ AI automation workflows during an Agentic AI Workshop.
- Sports:** Winners of the Interdepartment cricket tournament.

Certifications

- Oracle Certified Generative AI Professional
- Welcome to ServiceNow
- NPTEL – The Joy of Computing Using Python
- MongoDB Certified Associate Developer
- Data Analytics Virtual Job Simulation

Additional Information

Languages: English, Telugu, Kannada
